

Large Octagonal Urn

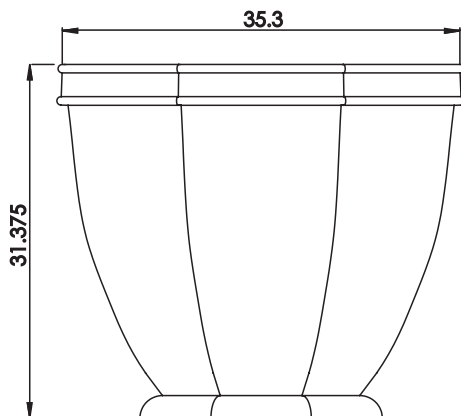

Shipping Wt: 680lbs
Soil volume: 11 ft³
Surface area: 860 in²

A smaller version of the octagonal urn is available.

The design is derived from an Arts and Crafts piece from the late 1800s. Graceful curves of the eight surfaces are defined by hard lines creating a unique and interesting shape. The octagon creates contrasting shadow lines which change as the sun transits the sky.

This Large Octagonal Urn is a distinctive planter with sufficient volume and surface area to support a variety of plantings.
